

Project	Milos Roof top
Project Type	Structural Strengthening and bar and restaurant fit out
Document	Design Brief / Scope of Work

Project Overview

Atlantis The Royal, Dubai intends to activate the currently underutilised rooftop of the standalone Milos Restaurant building to create a high-quality rooftop bar and lounge destination. The rooftop presents a unique opportunity to establish a signature venue offering panoramic views across Dubai's skyline to one side and the Atlantis The Palm fountains to the other. The proposed development will enhance the guest experience, maximise the value of the asset, and complement the positioning of Atlantis The Royal as a leading luxury lifestyle destination.

In 2023 Atlantis Dubai commissioned a feasibility study to determine whether the existing structure is adequate to accommodate a bar. The feasibility (issued with the RFP documentation) found that some strengthening work will be required to the existing roof members.

The Lead Design consultant is required to submit a proposal to undertake the following:

1. Validate the feasibility report
2. Deliver a design for the structural requirements
3. Deliver an MEP design for the new roof top bar
4. Deliver an Architectural / Interior design for the roof top bar
5. Deliver vertical transport design to facilitate the roof top bar
6. All Authority approvals

The Milos restaurant will be closed for four months as of the 1st June 2026. As such Atlantis Dubai wants to take the opportunity to strip the restaurant, undertake the structural works, rough in the MEP for the roof top restaurant and reinstate Milos by 30th September 2026.

The roof top restaurant will be constructed after the Milos restaurant has been reinstated and can be considered a 'phase 2' of the project. However, we are requesting a proposal for all works (phases 1 and 2).

Roof Top Bar operational brief

- Seat Count / Expected occupancy
 - 50-75 seated & 120 / 150 standing (subject to confirmation of usable floor space).
- Bar size
 - 3 bar stations (in one bar)
- Bar / lounge with light bite / finger food (no kitchen)
- BOH space requirement
 - If possible, a small BOH space & storage
- Washrooms required
- Dedicated lift

Key Objectives

To ensure that the project is on course to meet the Employer's objectives, the following are key points as wayfinders for a successful outcome:

- Speed and certainty to market – (1) securing stakeholder approval of the design and (2) high level of quality in the execution of construction
- Always maintaining guest satisfaction and safety – segregate construction from operations through development and agreement of a logistics plan

-
- Protecting revenue streams – minimise impact to revenue streams through the mantra of balanced revenue protection against the cost of works
 - Design development aligned to budget – develop a design that can be afforded
 - Create a space that is action packed, adventure filled, fun and lively (yet functional)

Key Employer's Criteria

It is intention of Atlantis The Palm that the following criteria are achieved:

- Strict adherence to project budget; value engineering and innovative designs with an emphasis on commercial competitiveness
- Completion of structural strengthening and re-opening of Milos restaurant by 15/9/2026.
- Retaining, refurbishing, and making good existing services (electrical, mechanical, fire & life safety, etc.) where possible (subject to new design)
- Local vendors, manufacturers, and materials to be used where possible

Roof top bar Concept

The Rooftop bar is a contemporary social destination designed to sit above Milos as a standalone venue with its own identity, atmosphere, and following. Positioned high above the Palm, the space offers sweeping 360-degree views across Dubai, creating an iconic setting that feels elevated, urban, and destination-worthy.

Created as a beverage-led experience, the rooftop blends refined cocktails, premium bottle service, and vibrant social energy within a setting that feels modern, stylish, and globally relevant. The venue is designed to attract Dubai residents and visitors who specifically travel to experience one of the city's most desirable rooftop destinations.

The atmosphere is confident, fashionable, and effortlessly cool, balancing a lively social scene with an approachable elegance. Rather than feeling like a hotel lounge, the space should feel independent and culturally connected, inspired by the world's leading rooftop concepts.

Design is edgy and layered, offering a variety of experiences through bar seating, lounge areas, VIP tables, semi-private corners, and elevated social zones. Service is personality-driven, with charismatic and engaging staff helping shape an environment that feels energetic, aspirational, and memorable.

The Rooftop transitions naturally from sunset drinks to late-evening social gatherings, becoming a place where guests come to connect, unwind, and be part of Dubai's most relevant social crowd.
